

1. Uninstall the old applications (sort-of optional)

Go to “Settings” on your phone.

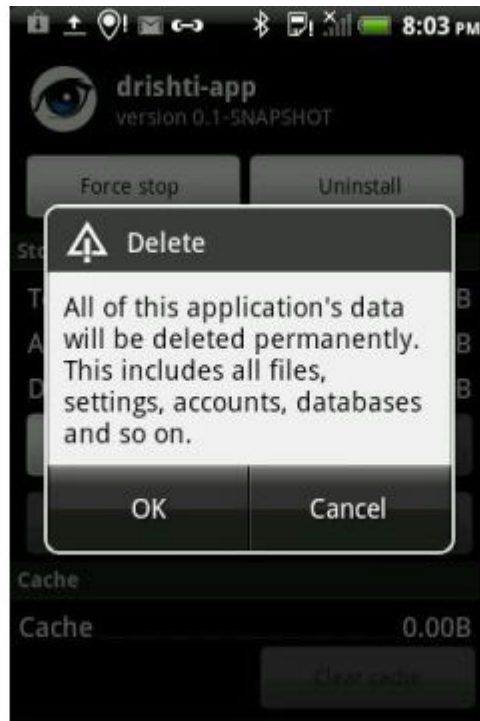

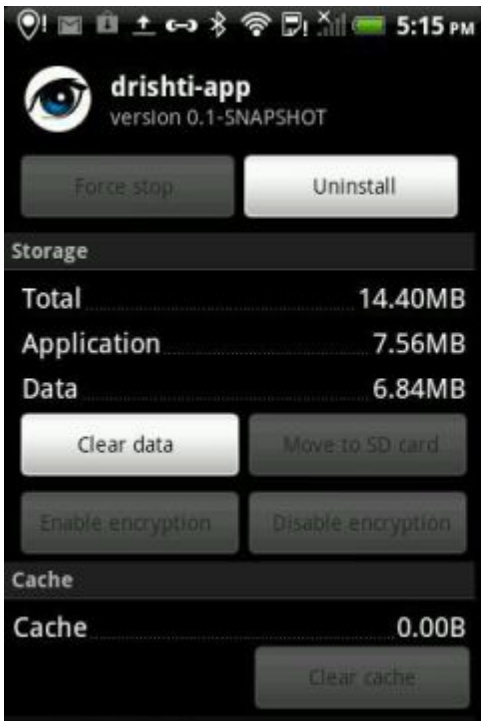

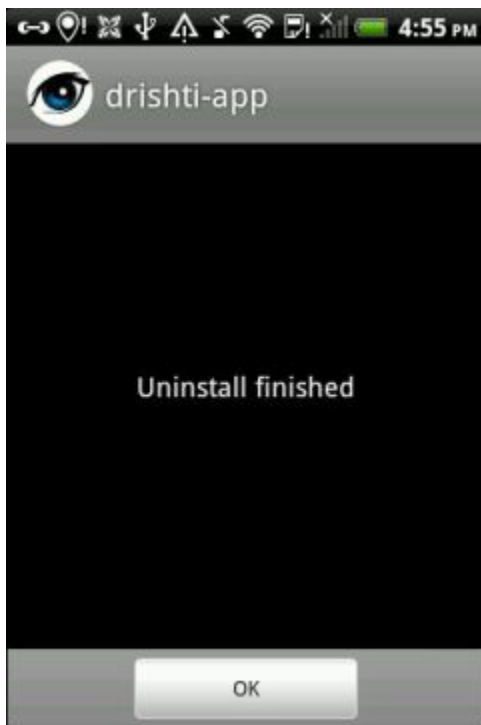

Go to “Manage applications”.

Go to “drishti-app”.

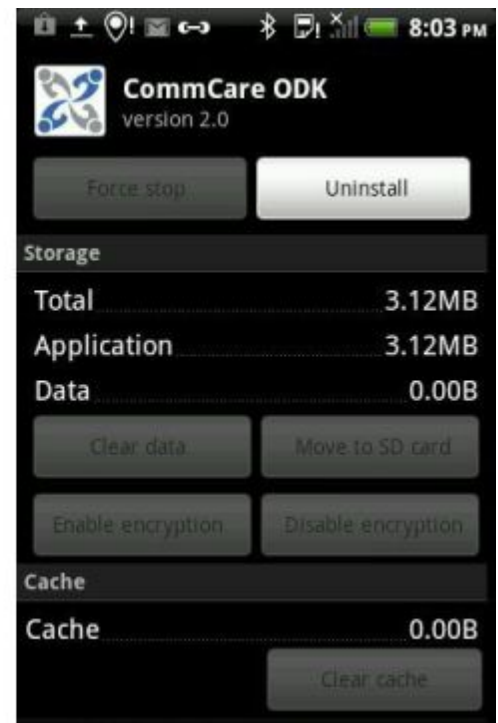

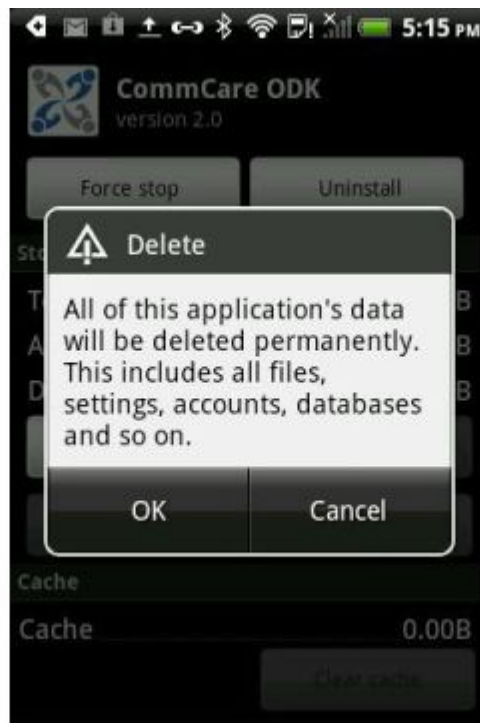

Uninstall the application. **Make sure you click on “Clear data” before you uninstall.**

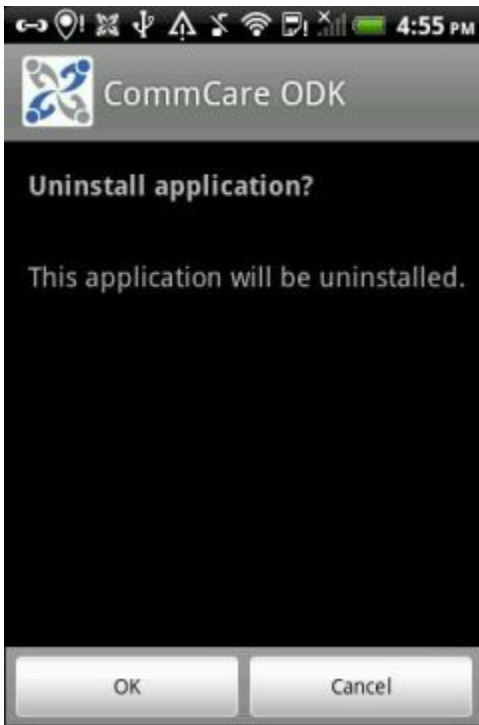

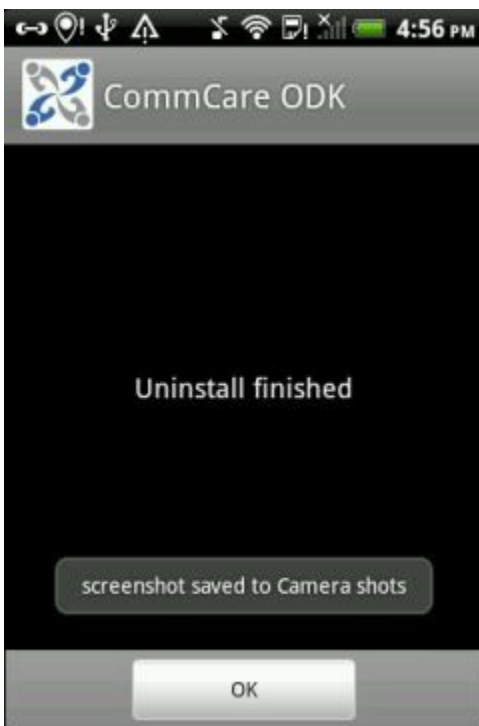

You should see something like this when it is done.

Now, do the same for CommCare ODK. **Make sure you click on “Clear data” before you uninstall.**

It'll ask for a confirmation.

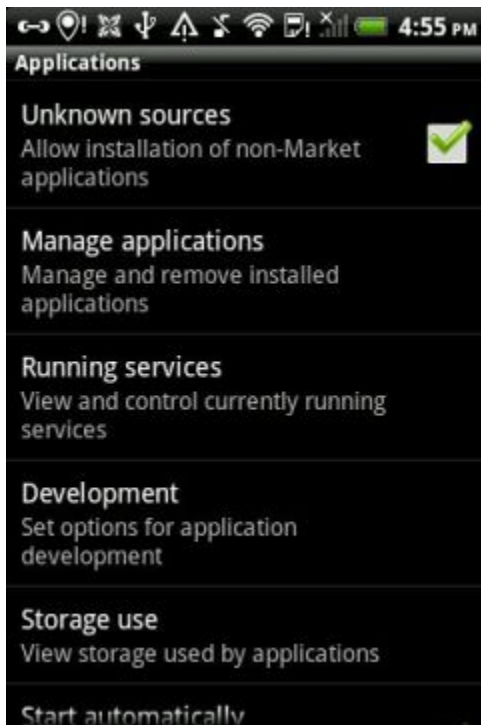

It's gone too.

2. Get the new applications (Dristhi and CommCare, APK files)

1. Download the APK file from Dimagi's build server.
 - a. Go to: <http://build.dimagi.com:250/login.html>
 - b. Click on "Login as Guest" link at the bottom of that page.
 - c. Go to [this page](#) and download the file with this name: commcare-odk.apk
2. Similarly, download the Dristhi application APK file (which will be normally sent in an email by us).
3. This part of the guide is device specific. You'll need to install the applications in whatever way your phone allows it. You might be able to use [Astro File Manager](#) to get the APK files and install them (ask

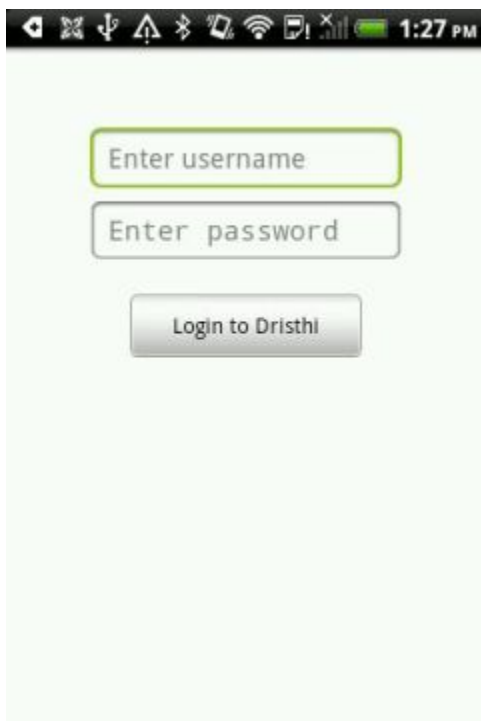

for help if you need it). You should also go to “Settings” and then the “Application” part in it to make sure that the option for “Unknown sources: Allow installation of non-Market applications” has been turned on:

Allow untrusted sources.

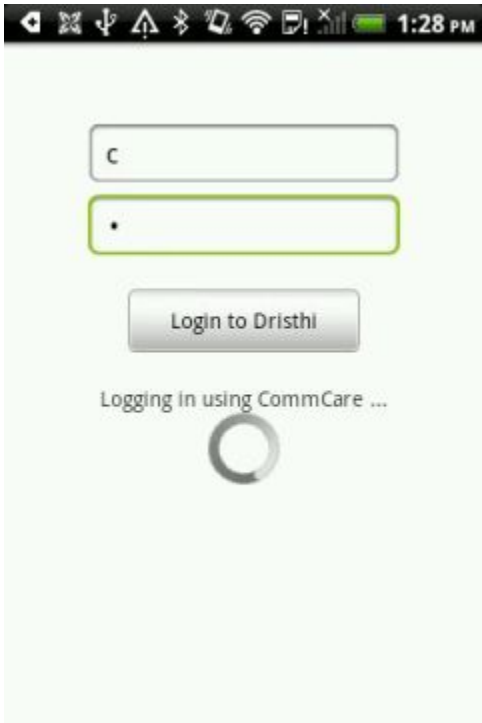

3. Start the applications and test them!

You probably know how to use CommCare already. So, here are some details about the Dristhi application.

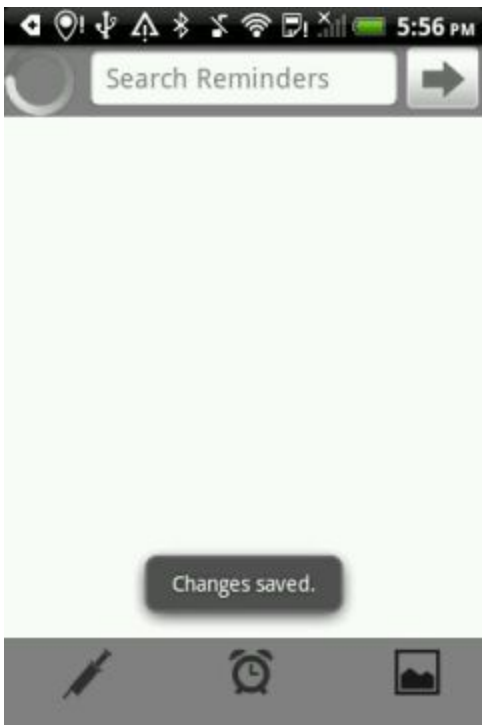

This is what you'll probably see when you start it.

Make sure you're connected to the internet!

Enter “c” for username and “1” for password, for now. It should work.

You should see a progress bar like in this image.

Search Reminders	
Udhaya	09 May 2012
13	HEP B0
Rahul	09 May 2011
66666	OPV 0
Abx	11 May 2012
44	OPV 0
Abx	11 May 2012
44	BCG
Abx	11 May 2012
44	HEP B0
Pinky	11 May 2011
44444466	BCG

Once the progress bar goes away, you should see some reminders.

Search Couples

Already up to date.

If you click the arrow on the top-right of that screen, you see the eligible couples, with their EC number and husband names.

Sometimes, after a while, the session might expire and you'll be back in a screen which looks just like the login screen, but with the username field disabled. You can enter the password again and continue.
